

This index shows a complete list of available soundtracks and their content. Playlists 1, 2, and 3 correspond to Performance Options 1, 2, and 3, depending on what ensemble configuration of actors, singers, choir, and narration your group needs. See the Performance Package information at easterscript.com for more information.

Version letters (A, B, C, etc.) are shown in the index to indicate which version of the track is used in a particular playlist, based on its content. As an example, the index shows that Track 7, "Main Tableau", uses version A for Playlists 1 and 2 (for groups which do not have their own choir), and version B for Playlist 3 (for groups performing with their own choir, so the choir has been removed from this version of Track 7). The track title in the downloaded playlist will be, "07 - Main Tableau (B)", to distinguish it from other versions of this track.

If your particular ensemble configuration differs from the standard performance options, the Supplemental Playlist contains less common versions of certain tracks that may meet your needs.

For your convenience, the Performance Soundtrack Library is provided as comprehensive collection of all available versions of all soundtracks in a single list.

Trk	Title (Segue Cue)	Contains					Sheet Music		Tracks for Groups with
